Dear Mr. M.K.N Gigaba

LIMPOPO ECO-INDUSTRIAL PARK MASTER PLAN

The above mentioned matter has reference.

Attached please find a copy of the Limpopo Eco Industrial Park Master Plan for your information.

The Limpopo Eco-Industrial Park (LEIP) is a private initiative, driven by Eco-Industrial Solutions (Pty) Ltd (EIS) with the support of the Office of the Premier. The LEIP will be located south west of Musina in the Limpopo Province, the Gateway into Africa, and EIS will be applying for Special Economic Zone status as soon as relevant legislation is promulgated. The LEIP will be the first zero solid-waste eco-industrial park in the world and is an outstanding example of sustainable development.

EIS, the project developers has worked closely with this office and the various provincial technical clusters over the past year, to ensure that the LEIP is aligned with national, provincial and local development frameworks and plans. This has resulted in the successful incorporation of the LEIP into the Musina Municipality and Vhembe Districts Integrated Development Plans and Spatial Development Frameworks.

The accompanying book describes the intended scope of the eco-industrial park, and provides an overview of how the national, provincial and local governments as well as people's aspirations are taken into consideration.

The park will benefit small business by assisting Small Medium and Micro Enterprises to take advantage of Musina's proximity and to develop export opportunities to Southern African countries. Furthermore, through its five major industrial components the LEIP will create about 80,000 direct and indirect jobs over the next six years, provide around 1,500 new permanent housing at Musina, add over US\$2 billion in annual revenue to Limpopo province, and significantly improve the national tax base.

It is our hope for this eco-industrial park to have comprehensive access to your support, particularly since it is clearly in line with our ongoing national initiatives for job creation, growth and sustainable development.

Sincerely,

Mr. C.C Mathale
Premier
